## THE TRANSPERSONAL PLANETS, OUTER PLANETS & NODES

The Transpersonal planets are Uranus, Saturn and Neptune. The Outer planets are Saturn and Jupiter. Both the Transpersonal and Outer planets orbit further from the Sun therefore they move much slower impacting overall themes in life whereas the Personal planets, Mercury, Venus and Mars, impact our day-to-day events.

Chiron is both a minor planet and a comet and acts as a sort of bridge between the personal planets and outer or transpersonal planets. Chiron in a natal chart shows where healing must take place to integrate health and grounded wisdom into our practical reality.

The North and South nodes are points where the Moon's orbit crosses the Earth's orbit around the Sun. They are one of the most important parts of our chart as they are contrasting energies that offer us insight into balancing the past and future.

In this session you will learn about the rest of the main players in Astrology. We will cover the Transpersonal planets, the Outer planets and Chiron, their glyphs, how they function in your chart and how to work with their energy. We will also learn about the North and South Nodes and the important and powerful role they play in your life's purpose.

## Understanding the Transpersonal Planets

<p><b>Uranus</b></p> 	<p>Uranus energy is all about invention, innovation and insight as well as individuality and freedom.</p> <p>It offers us breakthroughs, the Eureka! moments we have in life. Wherever it is in our chart shows the area where we are called to rebel against conformity, breakaway and do something unique for ourself.</p>	<p><i>Uranus rules Aquarius. Uranus stays in a sign for seven years and takes 84 years to circle the zodiac.</i></p>
<p><b>Neptune</b></p> 	<p>Neptune energy represents intuition, creative genius and our spiritual side as well as illusion and self-deception.</p> <p>It has to do with connecting with the nonphysical world - the veil between here and now and tangible and what is out there, beyond. Awareness is the key with Neptune as it is possible that the way we discover how to feel good isn't necessarily good for us.</p> <p>Wherever it is in our chart shows where we will best achieve a spiritual path; how we lose ourself and how we find ourself.</p>	<p><i>Neptune is the ruler of Pisces. It takes 146 years to circle the zodiac, with a stay of about fourteen years in each sign.</i></p>
<p><b>Pluto</b></p>  	<p>Pluto energy is all about transformation, metamorphosis and birth and death.</p> <p>Wherever it is in our chart shows where we must let go, the area where we have power struggles or are determined to rise up from the ashes and overcome. Pluto shows where we keep things secret and private; traumas and other pieces that are sensitive and aren't readily shared with others.</p> <p>Wherever Pluto is is an area of life that we become changed from in this lifetime, and may take a whole lifetime to happen.</p>	<p><i>Pluto rules Scorpio. It takes 246 years to circle the zodiac, with a stay ranging from eleven years to thirty-two years in a sign.</i></p>

## Understanding the Outer Planets

<p><b>Saturn</b></p> 	<p>Saturn energy represents discipline, structure and responsibility.</p> <p>Wherever Saturn is in your chart shows where you have the opportunity to learn through fulfilling obligations. However, when you are not upholding your intentions, you can experience Saturn through perceived restrictions, frustration, blockages and fears.</p> <p>It has to do with the opportunity to transform our limitations into our best asset.</p>	<p><i>Saturn rules Capricorn. It stays in a sign for 2.5 year and therefore takes 28 years to circle the zodiac.</i></p>
<p><b>Jupiter</b></p> 	<p>Jupiter energy is all about expansion, the search for meaning, truth, possibilities and abundance.</p> <p>Wherever it is in your chart shows where you express your ethics and values, as well as your spiritual and philosophical beliefs.</p> <p>It shows where you have faith and where you have dreams of future adventures or business.</p> <p>Jupiter is traditionally known as a sign for good fortune and demonstrates that when we focus on what we want with positive expectations, we can create and manifest "good fortune."</p>	<p><i>Jupiter rules Sagittarius. It stays in a sign for 1 year and therefore it takes 12 years to circle the zodiac.</i></p>

## Understanding Chiron

<p><b>Chiron</b></p>	<p>Chiron orbits between Saturn and Uranus and is the enigmatic messenger to our solar system. As we've learned, Saturn is the energy of limitations and how we view challenges and Uranus is all about high-mindedness. The jump from fear and restriction to revolutionary divine insight is through Chiron.</p> <p>This small cosmic body is associated with our persistent wounds, the deep, often hidden kind and our intentions and efforts to heal them. Wherever Chiron is in your chart reveals a core wound that may take a lifetime to work through. It also offers a wealth of knowledge and wisdom as you work through it that can be used to help others.</p>	<p><i>Chiron takes about 49 years to cycle through all of the zodiac sign and generally stays in a single zodiac sign for eight years. However, when it enters Saturn's orbit, Chiron can travel through a single sign in under two years.</i></p>

## The North and South Node

The North Node (Ascending Node) and South Node (Descending Node) in astrology are the two crossing paths of the sun and the moon. The nodes are always 180 degrees apart so they work as opposing aspects showing you both the abilities and challenges you need to address.

The North and South Nodes allow us to gain understanding of the gifts & talents within; what we have fully come into this life with (South Node) and what we have come into this life to develop (North Node).

### The North Node ~ Your Spiritual Path

The North Node depicts what you came into this life to step into, to evolve into and develop. Whatever sign or house your North Node is in shows where you are called to stretch yourself, the area of life where you are most called to keep going. Often it is the area where you know you want to go but you are undeveloped and have hesitation. In order to live our most fulfilling and harmonious life, we must face the unknown of our North Node qualities and not fall back on or solely rely on the qualities of our South Node that we've already mastered. For our Soul's development, and for the purpose of evolving, we must move out of our comfort zone and find the balance, between what we knew or lived in the past, and how to incorporate what we are here to achieve in this lifetime.

### The South Node ~ Your Past

Whatever sign and house your South Node is in shows what you have come into this life with. It shows your qualities of your past - childhood, past lives, otherwise known as inherent qualities and they have an irresistible pull.

The South Node shows where we are over-developed (skills we have mastered in another lifetime) and how we are getting stuck in it, as they have become comfort zones. Everything in life has a time, place and space. It takes awareness to develop the qualities of your North Node, for you can only consciously develop them, as you actively release the South Node, thus, attaining balance and harmonizing the opposing energies.
